

Trương Thị Ngọc An CNTT 1

Bài tập 1

```
class Animal
```

```
public void makeSound()
```

```
{ System.out.println("Heng keng cheng vat..."); }
```

```
class Dog extends Animal
```

```
{ @Override
```

```
public void makeSound()
```

```
{ System.out.println("gâu gâu..."); }
```

```
}
```

```
class Cat extends Animal
```

Một trang vở một tương lai

```

{ @Override
  public void makeSound()
{
  System.out.println("meo meo ...");
}

```

```

class Pig extends Animal
{
  @Override
  public void makeSound()
{
  System.out.println("in in ...");
}

```

```

class Bird extends Animal
{
  @Override
  public void makeSound()
{
  System.out.println("chip chip ...");
}

```

```

public class Dong Vat
{
  public static void main (String [] args)
  {
    Pig pig = new Pig ("lon xe");
    Dog dog = new Dog ("cho đen");
    Cat cat = new Cat ("meo đen");
    Bird bird = new Bird ("chim cu");
    pig.makeSound(); dog.makeSound(); cat.makeSound();
    bird.makeSound();
  }
}

```

Bài tập 2

```
class XeDap {  
    public void run () {  
        System.out.println (" dap bang chan " );  
    }  
}
```

```
class XeDapDien extend XeDap {  
    @Override  
    public void run ()  
    {  
        System.out.println (" dap co dien " );  
    }  
}
```

```
public class main {  
    public static void main ( String [] args )  
    {  
        XeDap xe = new XeDapDien ();  
        xe.run ();  
    }  
}
```
